Bath Time

Bath time provides a wonderful opportunity to connect with your baby.

Bath time provides a wonderful opportunity to connect with your baby; however some babies take a little time before they start to enjoy having a bath. The timing of your baby's bath is up to you. Some parents like to bathe their baby in the morning, while others bathe just before bedtime as it relaxes baby and becomes part of their night-time routine in preparation for bed.

Do I need a baby bath?

You don't need to buy a baby bath or even use a normal adult bath. Many parents have bathed their baby in the laundry tub!

Preparing for the bath

Being well prepared is the key to a relaxing bathing experience for both you and your baby. Before you start, place your baby somewhere safe such as in their bassinet or cot.

- Collect all the things you will need for bath time and put them in easy reach of the bath e.g. washer, cotton wool (if used), towel and mild soap or bath lotions you are using (if any)
- Other equipment, nappy and clothing will need to be ready next to the area you will dry and dress your baby.
- Remove your watch and any jewellery that might get in the way or scratch your baby
- The bath can be made less slippery by placing a hand towel or small rubber bathmat in the bottom of the bath
- Always start with cold water then top up with hotter water. If using a bathtub, make sure you finish by running the cold tap so that the tap fitting isn't hot to touch

- Test water temperature with the inside part of the wrist and make sure it is warm to touch
- When dressing or undressing your baby, make sure the room is comfortably warm (no draughts)

How much water?

- Try using a shallow amount of water at first
- Once you are confident, slowly increase the amount; babies often like enough water to float
- Constant watchfulness and common sense is key to bathing your baby
- Never leave your baby alone even for a split second in or near water

In the Bath

- Make sure you have a firm grip on your baby by placing your arm around their back and hold them round the arm furthest from you; and cradle the lower half of your baby's body with your other hand
- Lift and gently lower into the bath
- Supporting baby's head, lay your baby down in the bath so the back of the head is touching the water
- Using a head to toe routine, wash your baby's head first making sure you protect their eyes from soap or bath lotions
- The hair only needs washing twice a week; shampoo or lotions are not needed for newborn hair

If your baby becomes distressed during bath time:

- Gently talk or sing to your baby
- Position yourself so your baby can see your face and make eye contact
- Work slowly and smoothly and avoid sudden or jerky movements

Safety at Bath time

- Never leave your baby alone in or near water as they must be watched at all times by you (or another adult)
- If you need to answer the phone, take your baby with you
- Always double-check that the water temperature is comfortably warm before placing your baby into the bath

Our friendly team at Tresillian are here to support your family!

Book a visit to Tresillian:

Visit tresillian.org.au, fill in the short online contact form and one of our Nurses will call you back

Ask your local Health Professional, Child & Family Health Nurse, GP or early parenting support service to refer you and your child
